

Converting Linear Equations (A)

Convert standard to slope-intercept forms.

1. Standard form: $10x - 7y = -8$

Slope-intercept form: _____

2. Standard form: $8x + y = 9$

Slope-intercept form: _____

3. Standard form: $x + 6y = -2$

Slope-intercept form: _____

4. Standard form: $4x + 3y = 9$

Slope-intercept form: _____

5. Standard form: $3x + 12y = -8$

Slope-intercept form: _____

6. Standard form: $x + 2y = -8$

Slope-intercept form: _____

7. Standard form: $11x - 8y = 3$

Slope-intercept form: _____

8. Standard form: $4x + 5y = 4$

Slope-intercept form: _____

9. Standard form: $10x - 12y = -4$

Slope-intercept form: _____

10. Standard form: $3x - y = 9$

Slope-intercept form: _____
