

# TRANSFORMATIONS

## Test Review: Translations, Reflections, and Rotations

The table below summarizes the coordinate rules for rotations, reflections, translations and dilations on a coordinate graph.

Rotate (Turn) 90° Counterclockwise about the Origin		Rotate (Turn) 180° Counterclockwise about the Origin	
$(x, y) \rightarrow (-y, x)$		$(x, y) \rightarrow (-x, -y)$	
Reflect (Flip) Vertically across the Y-Axis	Reflect (Flip) Horizontally across the X-Axis	Reflect (Flip) Diagonally across Y = X	
$(x, y) \rightarrow (-x, y)$	$(x, y) \rightarrow (x, -y)$	$(x, y) \rightarrow (y, x)$	
Translate (Slide) Horizontally	Translate (Slide) Vertically	Translate (Slide) Diagonally	
$(x, y) \rightarrow (x + a, y)$	$(x, y) \rightarrow (x, y + b)$	$(x, y) \rightarrow (x + a, y + b)$	

Transform each figure as described. Write the ordered-pair rule for the transformation. Use the ordered-pair rule to find the coordinates of the vertices of the image.

1. **Translate**  $\triangle ABC$  horizontally  
4 units to the left.

$(x, y) \rightarrow ( \quad )$

A(  )  $\rightarrow$  A'(  )

B(  )  $\rightarrow$  B'(  )

C(  )  $\rightarrow$  C'(  )

2. **Translate**  $\square JKLM$  diagonally  
5 units to the left and 6 units up.

$(x, y) \rightarrow ( \quad )$

J(  )  $\rightarrow$  J'(  )

K(  )  $\rightarrow$  K'(  )

L(  )  $\rightarrow$  L'(  )

M(  )  $\rightarrow$  M'(  )

3. **Reflect**  $\triangle ABC$  vertically

across the  $y$ -axis.

$$(x, y) \rightarrow ( \quad , \quad )$$

$$A( \quad ) \rightarrow A'( \quad )$$

$$B( \quad ) \rightarrow B'( \quad )$$

$$C( \quad ) \rightarrow C'( \quad )$$

4. **Reflect**  $\triangle STU$  diagonally

across the line,  $y = x$ .

$$(x, y) \rightarrow ( \quad , \quad )$$

$$S( \quad ) \rightarrow S'( \quad )$$

$$T( \quad ) \rightarrow T'( \quad )$$

$$U( \quad ) \rightarrow U'( \quad )$$

5. **Rotate**  $\triangle DEF$   $90^\circ$  counter-clockwise about the origin.

$$(x, y) \rightarrow ( \quad , \quad )$$

$$D( \quad ) \rightarrow D'( \quad )$$

$$E( \quad ) \rightarrow E'( \quad )$$

$$F( \quad ) \rightarrow F'( \quad )$$

6. **Rotate**  $\square PLGM$   $180^\circ$  counter-clockwise about the origin.

$$(x, y) \rightarrow ( \quad , \quad )$$

$$P( \quad ) \rightarrow P'( \quad )$$

$$L( \quad ) \rightarrow L'( \quad )$$

$$G( \quad ) \rightarrow G'( \quad )$$

$$M( \quad ) \rightarrow M'( \quad )$$
